

MUNIR AHMED KHAN

Senior React Native Developer | Full-Stack MERN | AI-Integrated Mobile Apps

Islamabad, Pakistan | munir.ahmedktk@gmail.com | +92 343 4755846 | [LinkedIn](#)

SUMMARY

Senior React Native developer with 9+ years of experience across mobile and full-stack web development, including 3+ years leading React Native teams and shipping production apps on the App Store and Google Play. Proven track record architecting scalable MERN applications, integrating AI models (Gemini, Hugging Face, RAG pipelines) into mobile products, and owning projects end-to-end from client requirements through deployment. Comfortable mentoring developers, making architecture decisions, and delivering under deadline pressure.

CORE SKILLS

Languages: JavaScript, TypeScript, Java (Android)

Mobile & Frontend: React Native, React, Next.js, Redux, HTML/CSS, Tailwind CSS

Backend: Node.js, Express, REST APIs, OAuth2, JSON, XML

Databases: MongoDB, Firebase, Supabase, SQLite, SQL Server

AI / ML: LLM Integration (Gemini API), RAG Pipelines, Hugging Face, Model Fine-Tuning, Predictive Analytics

Cloud & DevOps: GitHub Actions, CI/CD, Vercel, App Store & Play Store Release Management

Tools: Android Studio, VS Code, Git, Postman

Leadership: Technical Leadership, Client-Facing Solution Design, Code Review, Team Mentorship, Documentation

PROFESSIONAL EXPERIENCE

Lead React Native Developer — Visionary Computer Solutions, Islamabad, Pakistan

Jun 2023 – Present

- Lead a team delivering multiple production React Native applications live on both the App Store and Google Play, including VcsPay (invoicing & payments), Xpense Diary (budget/finance tracker) and FocusFlow (Pomodoro productivity timer).
- Architect and integrate AI capabilities — including LLM-based chat, predictive analytics, and automation — directly into mobile app workflows, taking features from prototype to store release.
- Own technical discovery with clients: translate business requirements into architecture decisions and delivery plans for custom mobile solutions.
- Set coding standards and review architecture across the team's React Native codebases to keep releases stable across iOS and Android.

Senior Mobile Application Developer — Hack On Tech Software Solutions, Islamabad, Pakistan

Jul 2018 – May 2023

- Led development and deployment of multiple high-impact native Android and iOS applications across client engagements.
- Partnered directly with clients to gather requirements and provide technical recommendations, translating business needs into shipped features.
- Delivered a mobile application for a USAID-funded program supporting conflict-affected civilians in Afghanistan, and Android tooling for KPK's Insaaf Agriculture Department to support farmer productivity.

Junior Android Developer — Uprock Tech, Islamabad, Pakistan

Sep 2017 – Jun 2018

- Contributed to the development of several Android applications with a focus on performance optimization.
- Built foundational Android development expertise that shaped a full-time move into mobile engineering.

PUBLISHED APPS & PROJECTS

VcsPay — Invoices & Payments | *React Native · Node.js*

iOS: <https://apps.apple.com/us/app/vcspay/id6795543303>

Android: <https://play.google.com/store/apps/details?id=com.vcspay>

Xpense Diary — Budget & Personal Finance Tracker | *React Native*

iOS: <https://apps.apple.com/us/app/xpense-diary-budget-planner/id6793878772>

Android: <https://play.google.com/store/apps/details?id=com.xpensediary.app>

Pure Cleaner | *Android*

Android: <https://play.google.com/store/apps/details?id=com.vcs.purecleaner>

FocusFlow — Pomodoro Timer | *React Native*

iOS: <https://apps.apple.com/us/app/focusflow-pomodoro-timer/id6793014662>

RoastfyMe — AI Roast App | *React Native (Expo) · Node.js · Express · Gemini API*

- AI-powered app that generates humorous, personalized "roasts" using the Gemini API with a Node.js/Express backend.

Android: <https://play.google.com/store/apps/details?id=com.roastfyme.memeroast.creator>

Doc Chat — AI Document Chat App | *React Native · Node.js · Express · Gemini · MongoDB*

- Enables users to chat with uploaded PDFs via the Gemini API; built the parsing, text-extraction, and vector-based semantic search pipeline with an indexed MongoDB store for fast contextual retrieval.

Easy Donate — Charity & Fundraising Platform | *Android · Firebase*

- Global donation platform connecting donors, beneficiaries, suppliers and volunteers, with a short-video storytelling feed for campaigns.

EDUCATION

Bachelor of Computer Science

Kohat University of Science and Technology — 2012 – 2016
